

REMARKS

The changes to the attached drawing sheets containing Figs. 8, 9, 10, and 11 were made to align the dashed line labeled CFP to cross the optical axis where solid lines representing the ray trajectory cross the optical axis. The support for the change to Fig. 8 is found in paragraph [0085], i.e., "the beam incident on the transfer lens 27b passes through a port CFP on the optical axis."

Respectfully submitted,

WEBB ZIESENHEIM LOGSDON
ORKIN & HANSON, P.C.
